ConstructConnect Takeoff
v. 2.6.5.0
Release Date: October 15, 2020

V.2.6.5.0 is a scheduled upgrade to ConstructConnect Takeoff that includes various performance improvements and many bug fixes.

Contents

Fixes

We fixed several bugs in this version. The following are those likely to be encountered by an end user or originally reported by an end user:

- Unable to save or cancel changes made to a Project after revisions are matched.

- Long Bid Area names did not fully display in the Takeoff Item "card".

- Updated the "Set Group" option in the Takeoff Item list to "Set Type".

- Bid Cover Sheet Notes entered displayed in other Bids belonging to the same project.

- Users with permissions to duplicated projects couldn't see them until the program was restarted.

Known Issues

Some customers experience intermittent connectivity issues. We have been diligently working to ensure stability on our platform and have been deploying a series of fixes. We are closely monitoring all usage to make sure that we can confidently deliver you the best experience. We will continue to work to improve your experience as well as address any performance issues as we release additional maintenance fixes. We understand that reliability and trust in our service is absolutely critical to maintain your business, and we do not take our responsibility lightly to deliver upon that.

Should you have any issues, please report them immediately by contacting our Customer Support:
