Fixes	2
-------------	---

Fixes

We fixed several bugs in this version. The following are those likely to be encountered by an end user or originally reported by an end user:

- On the Takeoff Tab, clicking on any button before unpinned Panes are hidden didn't allow subsequent hiding of Panes.
- The Local Bid Date column on the Project and Bids list didn't match the Local Bid Date in the Bid Cover Sheet.
- Addressed issue where opening the Cover Sheet and clicking Edit Bid Information from the Takeoff Tab caused an unexpected program shutdown.
