Changes

Added Help Icons

We've added a Help icon inside the You and Your Company dialog that will connect you directly to a User Guide article with more information.

We've added a Help icon inside the Manage Project Access dialog that will connect you directly to a User Guide article with more information.

Fixes

We fixed several bugs in this version. The following are those likely to be encountered by an end user or reported by an end user originally:

- Addressed an issue where the price was not being saved when the Worksheet Tab was detached.
- Fixed issues that caused the application to shut down when the Takeoff Tab was detached, takeoff was performed, and changes were made to the Worksheet Tab.
