Fixes	2
Known Issues.....	2

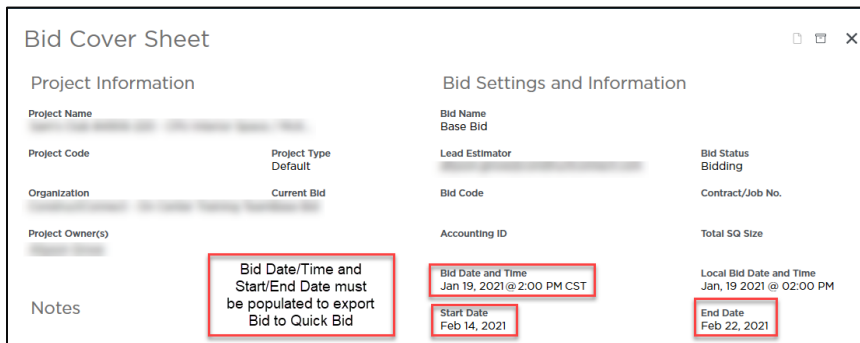

Fixes

The following are those likely to be encountered by an end user or originally reported by an end user:

- TD-20104 and TD-20105. Opening and detaching more than one takeoff window was causing the program to crash.

Known Issues

- If a Sheet no longer belongs to the Current Set in a bid because the Revision Page was deleted and the Original Page was deactivated, the takeoff and annotations done on the Revision Page do not get removed from the bid as expected and the totals on the Worksheet and Summary Tabs are incorrect.
 - **Workaround:** Activate/deactivate the Original Set
 - ***UPDATE:** Corrected for pages with takeoff. Work continues on pages with annotations as well.
- Bids originating from the ConstructConnect Platform cannot be imported into Quick Bid when the Bid Date, Bid Time, Start Date, and End Date are missing from the Bid Cover Sheet.
 - **Workaround:** Enter Bid Date/Time, Start/End Date on the Bid Cover Sheet in ConstructConnect Takeoff. Remember to press Tab or Enter after adding dates/times to activate Save button for Bid Cover Sheet.

The screenshot shows the 'Bid Cover Sheet' form with two main sections: 'Project Information' and 'Bid Settings and Information'. The 'Project Information' section includes fields for Project Name, Project Code, Project Type (Default), Organization, Current Bid, Project Owner(s), and Notes. The 'Bid Settings and Information' section includes fields for Bid Name (Base Bid), Lead Estimator, Bid Code, Contract/Job No., Accounting ID, Total SQ Size, Local Bid Date and Time, Bid Date and Time, Start Date, and End Date. Red boxes highlight the 'Bid Date and Time' field (Jan 19, 2021 @ 2:00 PM CST), the 'Start Date' field (Feb 14, 2021), and the 'End Date' field (Feb 22, 2021). A text box in the 'Notes' section states: 'Bid Date/Time and Start/End Date must be populated to export Bid to Quick Bid'.
