ConstructConnect Takeoff
v. 21.4.0.0
Release Date: April 9, 2021

V.21.4.0.0 is a scheduled upgrade to ConstructConnect Takeoff that includes several enhancements and number of bug fixes.
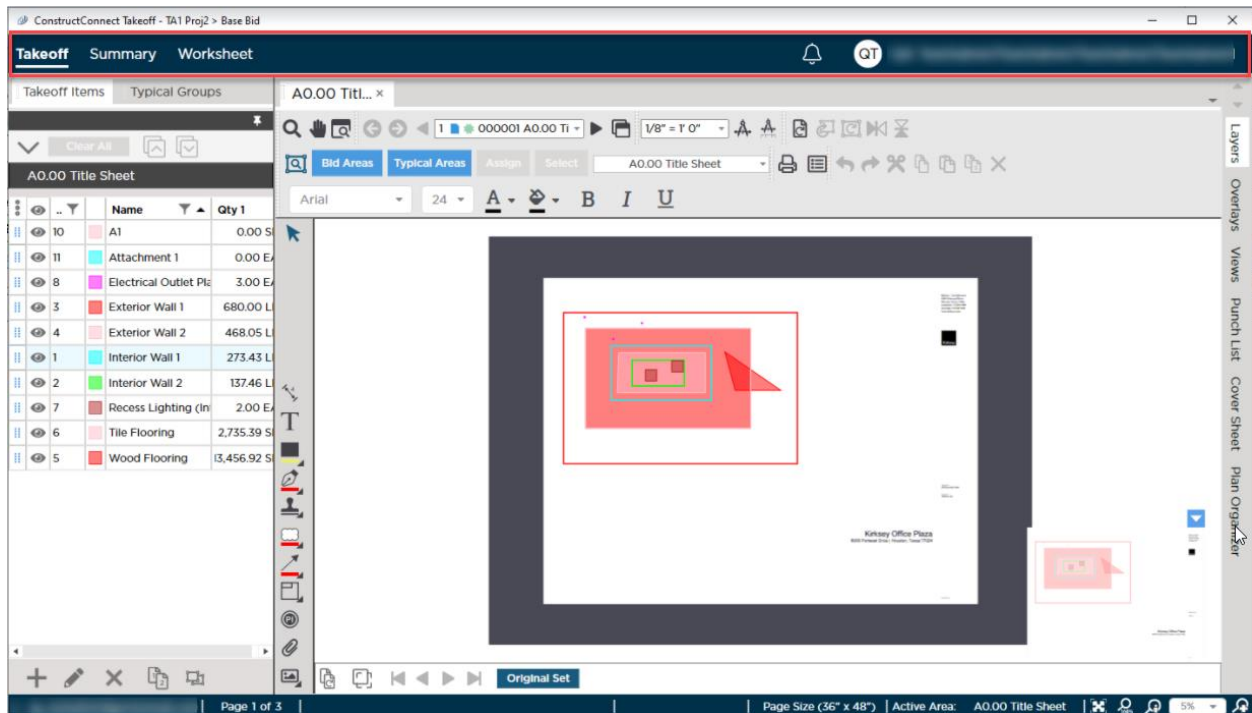

Contents

Changes

Increasing Canvas Space

In order to give users the maximum amount of space to view images, do takeoff, review quantity totals, and input pricing, we have decreased the size of the blue header on all the program tabs.

These changes will apply to both docked and undocked tabs to create more usable room on the canvas.

Resized header on all Program Tabs

Persistence of Project Type

Project Types from CC Project Intelligence will persist for projects sent to CC Takeoff.

Estimator Assignment for Sample Projects

You can now assign an estimator to any Sample Project you publish to your Projects and Bids List.

Fixes

We fixed a number of bugs in this version. The following are those likely to be encountered by an end user or originally reported by an end user:

- TD-19420. Deleting a Typical Group item changed current page selection to page where Typical Group frame is drawn.
- TD-19426*. Deactivating a plan set with pages containing takeoff in a bid when the project has more than one bid showed incorrect totals on the Worksheet and Summary tabs.
- TD-19560. Typical Group markers showed a background color.
- TD-19960. The Project Cover Sheet intermittently opened when the Bid Cover Sheet was selected.

- TD-19915. Rotating a page and then setting another page as a revision of it didn't rotate the revision to match the original.

Known Issues

- If a Sheet no longer belongs to the Current Set in a bid because the Revision Page was deleted and the Original Page was deactivated, the takeoff and annotations done on the Revision Page do not get removed from the bid as expected and the totals on the Worksheet and Summary Tabs are incorrect.
    - o *__Workaround:__* Activate/deactivate the Original Set
    - o *__* UPDATE:__* Corrected for pages with takeoff. Work continues on pages with annotations as well.
- Bids originating from the ConstructConnect Platform cannot be imported into Quick Bid when the Bid Date, Bid Time, Start Date, and End Date are missing from the Bid Cover Sheet.
    - o *__Workaround:__* Enter Bid Date/Time, Start/End Date on the Bid Cover Sheet in ConstructConnect Takeoff. *Remember to press Tab or Enter after adding dates/times to activate Save button for Bid Cover Sheet.*
