Features and Changes

Onboarding/First Time User Experience

Improve the First-Time user experience for CCTO by making it easy for customers to find resources to get them up and running, as well, as, learn about the application features and capability. In order to provide something in the short term, we will need to deliver the following:

Added a link to the “Getting Started” page under the profile name in the application.

Main Screen showing the new menu item for “Getting Started”.

And, added a shortcut to the same article on the user’s desktop.

Windows desktop showing the shortcuts for the application and the new shortcut to “Getting Started”.

Project and Bids List Performance Improvement

Improved performance when searching for a project or bid in the Project and Bids list that contains over 1000 projects

Worksheet Tab Changes

- Updated the look and feel of the Worksheet tab
- Changed the term “Unit” for \$/Unit as this column could represent the selling price of takeoff items.
- Moved the UOM column after the Quantities Total column to allow clarity of the condition results displayed.
- Moved the Bid Total from the application footer to the bottom of the Worksheet Tab to enhance visibility of the total bid price.
- Anchored the Bid Total to the bottom of the Worksheet Tab to allow visibility of the total bid price while the user scrolls through the condition results.

| No. | Condition Name | Res No. | Result Name | TOTAL | UOM | MATERIAL | | LABOR | | EQUIPMENT | | SUBS | | OTHER | | \$/Unit | Line Item | |
|------------|----------------|---------|----------------------------|-----------|-----|----------|-------------|----------|--------------|-----------|-------------|---------|----------|---------|-------------|-------------|----------------|--------------|
| | | | | | | \$/Unit | Subtotal | \$/Unit | Subtotal | \$/Unit | Subtotal | \$/Unit | Subtotal | \$/Unit | Subtotal | | | |
| Ceilings | | | | | | | | | | | | | | | | | | |
| 3 | ACT Ceiling | 1 | Area (minus Backrest area) | 25,507.47 | SF | \$3.50 | \$89,276.13 | \$5.00 | \$204,099.72 | \$2.00 | \$51,044.68 | \$0.00 | \$0.00 | \$2.00 | \$51,044.68 | \$5.50 | \$141,365.21 | |
| Demolition | | | | | | | | | | | | | | | | | | |

| | | | | | | | | | | | | | | | | TOTAL : | \$1,259,236.99 | |

Worksheet Tab – updated interface to make the screen more user-friendly.

Deactivating a Plan Set Workflow Improvements

- Takeoff is not deleted when deactivating a set – it is *deactivated* instead and removed from the project along with any Pages unique to the Set, but if the Set is reactivated, the takeoff is restored also.
- Dimensions, arrows, stamps, and highlight annotations are also not deleted when deactivating a set – they are *deactivated* and removed from the project along with any Pages unique to the Set, but if the Set is reactivated, the annotation is restored also.

Fixes

- Your User settings carry over after installing an upgrade.
- Grouping on the Conditions Pane persists (the Pane is still grouped, even if you close the bid or program).
- Filtering the Projects and Bids List persists (the List is still filtered, even if you close the program).
- Projects and Bids List no longer show a gap between projects after deleting a project.
- Searching for a bid in the Projects and Bids List no longer causes a crash.

Technology Improvements (Back of the House)

Improved Cloud performance and scalability using leading-edge technology.
